

# STOP THE ARENA

Join the movement fighting for Alexandria's future! We need YOUR help to defeat this!

## Financial Liabilities

*Economic research shows that public financing for sports arenas does not provide net economic benefit to their communities.*

## Public Subsidies

*All tax revenues are taxpayer monies. Every dollar of tax revenue diverted to the arena is a dollar not spent on other critical public needs. We should demand economic development that doesn't heavily subsidize a billionaire.*

## Community Input & Buy-In

*The City should do real public engagement with citizens and be transparent about the feedback they are receiving. They should only move forward if there is buy-in from most Alexandria residents.*

## Traffic & Infrastructure

*Transportation issues are likely insurmountable. Route 1 & GW Parkway will be nearly undriveable during event days, harming residents & businesses. We cannot force everyone to take Metro.*

## Environmental Impact

*The City has not presented any environmental impact studies related to flooding, wetlands, soil stability, or other key issues that need to be evaluated before moving forward with this project.*

## Affordable Housing

*Longtime residents pushed out of affordable housing. Development should serve all our city's residents, not just corporations.*
